NEW

Overview

The VCC-2™ is a USB Desk Console designed for use with popular software dispatch consoles

The VCC-2™ has unique features geared for use in public safety . Features include: ports for integration with commonly available: Plantronics PTT headsets, PTT handset, footswitch and built in gooseneck microphone. The VCC-2 provides intuitive controls for speaker volume, & PTT. The large PTT button provides a 'hot key' sequence to the software application to actuate press to talk functions. The 'hot key' sequence can be factory customized upon request. The VCC-2 utilizes Windows™ standard USB audio drivers, making installation a breeze.

The VCC-2 is an easy to setup & easy to use interoperability tool with high quality audio, numerous integration features and it is half the size of the VCC-3.
