

VM-1S™ USB Dispatch Microphone

Standard Features

VM-1S™ is a USB Dispatch Microphone designed for use with Soft Dispatch Console applications from Motorola Solutions, SmartPTT, Skytec, *TRBOnet*, iNemsoft, Hytera, RF Technology & others.

When a simple yet rugged economical Dispatch Microphone is required, the VM-1S™ is the answer.

Specifically designed to work in continuous operation, the Steel bodied Microphone will stand up to the rigors of a Dispatch environment.

The VM-1S™ uses a high quality Keyboard switch with a RED button for the Push to Talk activation, a Close talking 18" Gooseneck microphone and a green LED which indicates power and USB connection.

The VM-1S™ can be factory configured to provide the standard HID sequences such as Keyboard "Hot Key", "Game Console" or "Joy Stick" to the Software application for the Press To Talk function. The "HID" sequences can be factory customized by request.

Standard Windows™ USB audio Drivers allow the VM-1S™ to be easy to setup & easy to use, just plug and "GO".

Designed and Built in the USA.
