

ETC UC-2 Under Counter Jack Box Accessories

Overview

ETC's UC-2 Microphone Accessories are designed to work flawlessly with the UC-2 Under Counter USB Station. FP-115 and HW510 Headsets and BPM-18 Belt Packs also work with the UC-2 but are not shown here.

UC-2 Under Counter USB Station

UC2M/C

UC2M/C Gooseneck Microphone with Clamp provides a unique mounting option for the ETC 18" Microphone for the UC-2 Under Counter USB Station. The Microphone Clamp accessory can be attached to a monitor stand or clamped to the back of a desk. A standard modular (6 wire) cord plugs into the microphone base and the other end connects to the Headset port (RJ-14 Modular Jack) of the UC-2.

UC2MB

UC2MB mini PTT Microphone Button provides the Station user a small easy method to key the Gooseneck Microphone / Clamp. The mini PTT pad connects to the Foot Pedal port of the UC-2 Under Counter USB Station with 1/8" (3.5mm) plug on a 6' cord. If a Foot Pedal is also used then a standard 1/8" "Y" Dongle allows both devices to operate. The Microphone Button plugs into the 1/8" Foot Pedal jack in the rear of the UC-2.
